Lo spazio
organizzato verticalmente,
intelligente e creativo.

Space
organized vertically,
smart and creative.

FIT

E' l'innovativo sistema di accessori interni, che si adatta come un abito sartoriale all'interno dei cassetti di ogni cucina, dando massima libertà di configurazione e ordine degli spazi in base al proprio gusto e alle proprie esigenze.

FIT si contraddistingue per la precisa disposizione organizzata in senso verticale e per la sua eleganza adatta ad ogni situazione.

La tipica suddivisione verticale permette di sfruttare al massimo tutti gli spazi.

Ricco e ricercato nel design, FIT è realizzato con una cura e precisione artigianale nei dettagli, utilizzando materiali pregiati di alta qualità.

Tutti gli elementi che compongono la serie sono realizzati a partire da una base in MDF nero in pasta, successivamente impiallacciati con essenze di legno.

Gli elementi divisorii sono in legno massello oppure in alluminio anodizzato o verniciato.

I materiali utilizzati comprendono speciali finiture antigraffio per un uso sempre sicuro e duraturo nel tempo.

Nel sistema FIT sono previste la versione portaposate e la versione dispensa, declinate in differenti composizioni e misure.

FIT is the innovative system of interior accessories that fits like a tailored suit inside the drawers of every kitchen, giving complete freedom to set up and organize spaces, according to every personal demand.

FIT is characterised by the precise vertically organized disposal and by its elegance, adapt to every situation.

The typical vertical disposal allows to make maximum use of all the spaces.

Rich and refined in design, FIT is realized with a craftsman's attention to details, only using the finest high quality materials.

All the elements that make up the series are made from a black MDF base, topped with veneer and wood essences.

The dividing elements can be made of solid wood, anodized aluminum or varnished aluminum.

The materials used include special anti-scratch finishes for a safe and long lasting use.

The FIT system includes the cutlery version and the pullout version, both characterized by different compositions and measures.

FIT PORTAPOSATE FIT CUTLERY INSERT

Gli elementi portaposate FIT si dividono in due tipologie di configurazione.

La prima, con la classica suddivisione degli spazi per la posateria. La seconda, invece, più orientata al contenimento degli accessori e agli attrezzi da cucina. Entrambe possono poi essere arricchite da accessori opzionali come portacoltelli, portapellicole, portaspezie, contenitori in vetro, portacialde caffè, taglieri, etc.

The FIT cutlery elements are divided into two typologies of configuration.

The first, with a classic division of spaces, suitable for cutlery. The second, instead, oriented to the containment of accessories and kitchen tools. Both can then be enriched with optional accessories like knife holders, film holders, spice containers, glass containers, coffee pot holders, cutting boards and so on.

Dai cassetti
al mobile colonna una
rivoluzione degli spazi.

From drawers to columns
a revolution of spaces.

FRAME

L'ambiente cucina si sta evolvendo verso nuove forme abitative, in risposta agli stili di vita contemporanei. La classica cucina, concepita con ripiani e pensili, lascia il posto a una distribuzione più destrutturata e al tempo stesso inclusiva.

Al centro troviamo un'isola attrezzata con il piano cottura, lavello ed elettrodomestici abbinati, mentre lungo le pareti i mobili diventano colonne che possono nascondere completamente, o lasciare a vista, gli elementi posti sulle differenti mensole.

In questo contesto nasce Frame, il nuovo sistema di accessori interni per le colonne cucina, progettato per ottenere grande funzionalità, libertà e possibilità di sperimentare nuove modalità di organizzazione.

Frame è composto da un telaio in alluminio verniciato, abbinato a una serie di accessori dedicati, realizzati con materiali pregiati, speciali finiture antigraffio e curati nei minimi dettagli.

La collezione è pensata per differenti funzionalità. Ogni ripiano assolve a una funzione specifica: si passa dal portapiatti al portabicchieri, portabottiglie, portacalici, portapentole, portacoperchi, fino alla classica mensola.

Frame è disponibile in due profondità, una standard e una ridotta, più specifica per gli strumenti da cucina della zona preparazione. Questa seconda versione può anche essere predisposta per contenere prese Schuko e USB.

Gli elementi possono essere mixati tra loro per ottenere la massima libertà e personalizzazione. A completamento è possibile aggiungere, ad alcuni di questi elementi, gli accessori della linea Fit/Filo.

Kitchen environments are evolving towards new living conditions, in response to the different styles of contemporary life. The classic kitchen, thought with shelves and kitchen cabinets, gives place to a more destructured and, at the same time, inclusive distribution.

At the centre we find a kitchen island with cooktop, sink and domestic appliances combined, while along the wall furniture becomes columns, which can completely hide all the elements or leave them exposed on the different shelves.

In this context Frame is born, the new system of internal accessories for kitchens columns, designed to obtain great functionality, freedom and the possibility to experience new ways of organization.

Frame is made of a painted aluminium frame, combined to a series of dedicated accessories, realized with fine materials, special anti-scratch finishes. Careful attention is paid to every minimum detail.

The collection is thought for different functionalities. Each shelf has a specific function: we go through the dish holder, the glass holder, the bottle holder, the wine glass holder, the pot holder, the lid holder, up to the classic shelf.

Frame is available in two different depths, the standard one and a reduced one, more specific for kitchen's tools from the food preparation area. This second version can also be equipped with Schuko sockets and USB ports.

The different elements can be mixed together to obtain the maximum freedom and customization. To complete Frame it is possible to add, to some of these elements, the accessories from the series Fit and Filo.

FRAME TELAIO CONTENITORE CONTAINER FRAME

Il telaio del sistema Frame, disponibile in due profondità da 500mm e 260mm, è una struttura che permette di comporre tutte le configurazioni secondo le proprie specifiche esigenze.

Il sistema possiede come opzione la possibilità di installare un'illuminazione formata da una barra led dual color che viene inserita all'interno dei profili e che può essere posizionata sia nella parte anteriore, sia nella parte posteriore sia su entrambi i lati.

Frame's containing structure, available with a depth of 500mm or 260mm, allows for the creation of different configurations, to align with everyone's needs.

The structure has the possibility to install a dual color LED lighting, which is incorporated inside the profiles and can be positioned on the front side, back side or on both sides of the structure.

ACCESSORI

Troviamo
uno spazio perfetto per
ogni oggetto da cucina.

We find
a perfect place for
every single kitchen's tool.

Dove lo metto?

Abbiamo pensato a tutto!

Quando entriamo in una cucina ci accorgiamo che tanti piccoli oggetti di utilizzo quotidiano, impiegati nella preparazione di cibi e bevande, non hanno un collocamento specifico. Spesso vengono posizionati sul piano della cucina, appesi a ganci o calamite, riposti su mensole e ripiani, oppure sparpagliati all'interno dei cassetti.

Per chi desidera organizzare e ottimizzare gli spazi, ogni oggetto potrà avere il suo giusto collocamento.

Il sistema FIT e FILO è arricchito da una serie di speciali accessori, posizionabili in compartimenti specifici dei portaposate e delle dispense, studiati per contenere molti degli oggetti che altrimenti non avrebbero un loro spazio definito.

Si tratta di coltelli, pellicole per alimenti, cialde per caffè, portaspezie, set per la preparazione degli impasti, set per i condimenti. E ancora, set dedicati alla preparazione di cocktail e vini, alla consumazione di formaggi e sushi, appositi spazi per riporre taglieri, portabottiglie, portabicchieri, sino allo scolapiatti.

La collezione FRAME, analogamente, è stata studiata per contenere i medesimi accessori, disposti all'interno di alcuni dei ripiani nel mobile colonna.

Nei sistemi Fit e Filo è previsto inoltre un compensatore di profondità, che viene utilizzato all'interno dei cassetti con profondità 60 cm. Può essere abbinato al fondo dei portaposate o delle dispense. Il compensatore è disponibile per cassetti da 45, 60, 75, 90, 105 e 120 cm di larghezza.

Where do I put it?

We have thought of everything!

When we walk into a kitchen we realize that a lot of small objects, daily used for food and drink preparation, don't have a specific place where to be placed. They are often laid onto the kitchen's worktop, hung on hooks or magnets, put on shelves or just spread inside the drawers.

For those who desire to organize and optimize all the spaces, every object will have its right placement.

The FIT and FILO system is enriched by a series of special accessories that can be placed into specific cutlery and pull out's sectors, designed to contain some of those objects that otherwise wouldn't have a storage space.

Knives, cling films, coffee pots, spice containers, sets for dough preparations, condiments sets. And again, sets for cocktails and wine preparation, for cheese and sushi consumption, spaces for cutting boards, bottles holders, glasses holders and dish racks.

The FRAME collection, similarly, was designed to contain the same accessories, placed into some of the shelves inside the column.

A depth spacer is also provided for FIT and FILO systems, used inside drawers with a depth of 60cm. It can be used together with the cutlery inserts or the pull out. The spacer is available for drawers with widths of 45, 60, 75, 90, 105 and 120 cm.

CONFIGURAZIONI E FINITURE ACCESSORI

Qualche suggerimento per ordinare e organizzare cassetti e dispensa, tenendo conto delle differenti misure e vani disponibili.

I 19 accessori pensati per i portaposate FIT, FILO e per alcuni contenitori FRAME, si inseriscono perfettamente all'interno dei divisori secondo gli schemi indicati di seguito.

Nelle versioni dispensa Fit e Filo lo spazio è invece più aperto e meno vincolante. Per questo motivo sono stati progettati delle eleganti, pratiche e funzionali box multiuso posizionabili in serie, parallelamente o perpendicolarmente all'apertura del cassetto.

Questi componenti esaltano e completano le funzionalità dell'intero sistema, permettendo di caratterizzare ciascuno spazio secondo le proprie necessità.

Tantissime combinazioni e una grande libertà nella scelta, con infinite possibilità da esplorare.

Some suggestions to tidy up and organize drawers and pull out, considering the different measures and spaces available.

The 19 accessories, thought for FIT, FILO and some of the FRAME shelves, perfectly fit into the dividers, as indicated in the following schemes.

In FIT and FILO pullout versions, the space is more open and less constraining. For this reason, some elegant, practical and functional multi-purpose boxes have been designed, to be positioned either in parallel or perpendicularly to the opening of the drawer.

These components exalt and complete the overall system functionality, allowing to define each space following each one's necessities.

Lots of combinations and a great freedom of choice, with countless possibilities to be explored.

L'elevata qualità dei prodotti Tecnoinox si manifesta anche nella scelta di materie prime che garantiscano un approccio responsabile nei confronti dell'ambiente.

Tecnoinox è pertanto un'azienda certificata **FSC®** e **CARB2**, garantendo l'origine e la tracciabilità dei materiali impiegati, unita al monitoraggio delle quantità di emissioni inquinanti prodotte durante la loro realizzazione.

La certificazione **FSC®** viene emessa dal **Forest Stewardship Council®**, un'organizzazione internazionale non governativa che promuove una gestione delle foreste del mondo ambientalmente adeguata, socialmente utile ed economicamente sostenibile. Per saperne di più, visita il sito fsc.org.

La certificazione **CARB2** viene emessa dalla California Air Resource Board, un'agenzia governativa americana nata con lo scopo di monitorare la qualità dell'aria e la salute dei cittadini. Questa certificazione garantisce dei valori massimi di formaldeide emessi nell'ambiente durante la produzione di pannelli in legno e compensato, utilizzati in molti dei prodotti Tecnoinox.

Infine, sempre in un'ottica di recupero e riciclo dei materiali, i prodotti Tecnoinox sono progettati massimizzando la semplicità nel disassemblaggio a fine vita, agevolando tutti i processi post-uso dei prodotti.

The high quality standards adopted in Tecnoinox products is also shown in the choice of environmental-responsible raw materials.

Tecnoinox is therefore an **FSC®** and **CARB2** certified company, ensuring the origin and traceability of the materials employed, together with the monitoring of pollutants emissions during their production.

The **FSC®** certification is emitted from the **Forest Stewardship Council®**, an international non-governmental organization, promoting a worldwide forests management being environmentally adequate, socially useful and economically sustainable, learn more on fsc.org.

The **CARB2** certification is emitted from the California Air Resource Board, an american government agency born to monitor air quality and citizen's health. This certification ensures for maximum values of formaldehyde emitted during the production of wooden and plywood panels, materials used in many Tecnoinox products.

Finally, to allow for materials reuse and recycling, Tecnoinox products are designed to maximise the ease of disassembly, facilitating all the post-use processes on industrial products.
